Advantage of this procedure:

- The countries which take part in the EC do not have invest extra for again a displacement.
- Other countries which do not take part in the EC have thus the chance this of playing sport further, but for these extra qualification round must invest to be able meet the selection criteria of their country (some countries must present also firstly performances to be able take part in a WC!). Thus these countries must wait not still 4 years to be able take part in following large tournament.
- The chance is there that the countries which do not take part in EC or WC a better level have than 4th the or 5th of EC.
- the system of volleyball is a large difference with proposal for football. At volleyball it is a restricted qualification round, at football this is for everyone.

Extra comments :

Some countries can a good reason that them has not been possible take part in EC and WC. Some countries property possible today problem with subsidy of the overheads for EC an WC. Possible not problem for Deaflympics: reason subside are from NOC and not of overheads. Possibly there are problems also other.
